SUMMARY

Applied AI builder with a performance marketer's sense of the business. Managed **\$75M+ in media investment** since 2023 across healthcare, retail, and logistics as channel lead with manager-level ownership. Designs, evaluates, and ships Claude skills and agents that turn raw call and campaign data into client-ready decisions inside locked-down enterprise tools, grounded in hands-on Invoca work in regulated healthcare.

EXPERIENCE

Ovative Group | Senior Analyst, Search Engine Marketing, Chicago, IL **Jun 2023 - Present**

- Operate as channel lead with manager-level ownership across seven healthcare business units under a Fortune 5 payer, a national retail brand, and a global logistics provider; present weekly to 12+ client stakeholders, run quarterly business reviews and partner syncs, and led the SEM workstream for a new healthcare provider program through launch.
- Modernize healthcare programs from raw-volume optimization toward qualified outcomes by designing conversion-action architecture and Value-Based Bidding around **Invoca call-quality and spoken-phrases signals**, then translating the design into revenue-tied KPI hierarchies that non-technical client leadership could act on.
- Drove a **175% YoY increase in enrollments** for a national Medicare insurance marketplace during AEP through broader qualified reach, campaign restructuring, and rebuilt conversion pathways, with results that earned **\$5M in incremental client investment** on \$30M+ in AEP spend.
- Built Claude skills that qualify **~1,000 Invoca call records a week**, segment them, and tie qualified calls to the paid campaigns that drove them, then draft near client-ready insights, **cutting each run from 45 minutes to 5**; built inside a locked-down enterprise stack with no API access, using MCP connectors and scheduled exports.
- Built an evaluation layer of golden datasets, grading rubrics, and LLM-as-judge scoring that tests each skill version and catches errors before client delivery; agents that act keep a human approval step.
- Built a visual workflow builder that turns flowcharts into reusable Claude skills with stored account context, **cutting skill build time from hours to ~30 minutes**; diagnostic agents built on it **cut time spent diagnosing performance shifts by up to 50%**.
- Built automated reporting, pacing, and forecasting systems solo with AI tools, used by **5 analysts across 10 client accounts** and **saving 300+ hours per quarter**, with built-in data-integrity checks that catch broken tracking and understated spend before they reach clients.
- Reversed declining efficiency on a national retail brand, **cutting spend 13% YoY while growing revenue 5% and improving ROAS 20%**, then led the account's migration off SA360 without performance disruption.
- Coach two analysts on the healthcare accounts, partnered with a junior analyst on his first Claude tool, ran a self-authored 13-week intern curriculum that earned a return offer, and author the team's AI trainings.

Zero To Secure | Founder, Chicago, IL **Jul 2025 - Present**

- Founded and run a bootstrapped DTC e-commerce brand solo, owning positioning, Shopify development, SEO content, and go-to-market, with AI agents for organic growth and creator outreach behind a human approval step.

AbbVie | Strategic Initiatives Analyst, North Chicago, IL **Mar 2022 - May 2023**

- Supported the \$63B AbbVie-Allergan enterprise integration, resolving cross-functional process bottlenecks and building reporting tools that gave integration leadership clearer visibility into workstream status and risk.

EDUCATION

University of Wisconsin-Madison, Madison, WI **May 2023**

Bachelor of Business Administration, Double Major: Marketing, Risk Management & Insurance
