SUMMARY

Day-to-day client lead with $75M+ in media managed since 2023, now running nine accounts, including seven healthcare business units under a Fortune 5 payer. Presents weekly to client stakeholders, runs quarterly business reviews, leads discovery and pitches incremental budget to decision-makers. Also builds the LLM workflows behind the work, including production Claude skills that qualify ~1,000 calls a week for one client, backed by golden datasets, LLM-as-judge scoring and human review.

EXPERIENCE

Ovative Group | Senior Analyst, Search Engine Marketing Chicago, IL | Jun 2023 – Present

Channel lead for a Fortune 5 payer's seven healthcare business units, a national retail brand and a global logistics provider.

Client leadership and results

- Drove a 175% YoY enrollment increase for a national Medicare marketplace during the Annual Enrollment Period (AEP). Results earned $5M in incremental investment, bringing AEP spend to $35M. Owned the full forecast and budget plan in other AEPs.
- Present weekly to 12+ client stakeholders and run quarterly business reviews across a Fortune 5 payer's healthcare portfolio.
- Led new-account discovery, handled objections with data-backed rebuttals, pitched incremental budget to decision-makers.
- Designed Value-Based Bidding around call-quality signals, moving healthcare programs from raw call volume to qualified outcomes with revenue-tied KPIs for non-technical client leaders. Kept AEP campaigns compliant with CMS-approved copy.
- Led the SEM launch for a new healthcare provider, from strategy to reporting on qualified calls and appointments.
- Reversed declining efficiency on a national retail brand, cutting spend 13% while growing revenue 5% and ROAS 20%, then led its migration off SA360 without disruption.

AI systems and enablement

- Cut call analysis from 45 minutes to 5 per run across ~1,000 calls a week for one client. Set up Invoca spoken phrase and built Claude skills that pair its exports and tracking data with Google Ads and Microsoft Ads data over MCP to categorize calls and draft client-ready insights inside a locked-down stack. This was manual work because Invoca data wasn't 1:1 clean.
- Built the evaluation layer behind those skills. Golden datasets, rubrics and LLM-as-judge scoring test every version before client delivery, and any agent that takes action needs human approval.
- Saved 300+ hours a quarter by rolling out AI reporting, pacing and forecasting automations to 5 analysts across 10+ accounts.
- Built a visual workflow builder that cut skill build time from hours to ~30 minutes.
- Cut review time 50% with a Claude tool that critiques and corrects reasoning on drafts by a direct report and three analysts.
- Ran a 13-week intern curriculum that earned a return offer.

Zero To Secure | Founder Chicago, IL | Jul 2025 – Present

- Founded and run a bootstrapped DTC brand solo, owning Shopify development, SEO content and go-to-market, with AI agents for organic growth and creator outreach behind a human approval step.

AbbVie | Strategic Initiatives Analyst North Chicago, IL | Mar 2022 – May 2023

- Supported the $63B AbbVie-Allergan integration, resolving cross-functional bottlenecks and building reporting tools that gave leadership visibility into workstream status and risk.

PROJECTS

Medicare Enrollment Call Evaluation Pipeline | Personal project, synthetic data

- Python pipeline grading synthetic Medicare calls on TPMO disclaimer, scope of appointment, eligibility and plan accuracy.
- LLM-as-judge and rule-based checks calibrated against a blind-labeled, reviewed answer key and audited against planted answers, ending in a published eval readout.

Call Analytics MCP Server | Personal project, synthetic data

- MCP server that lets Claude query graded calls, grade new ones through the pipeline and draft offline-conversion batches; releasing a batch requires human approval, enforced in code rather than the prompt.

EDUCATION

University of Wisconsin-Madison | BBA, Marketing and Risk Management & Insurance May 2023

SKILLS

- **AI and Evaluation:** Claude (Enterprise, Code), Agent Skills, MCP, Evals (Golden Datasets, LLM-as-Judge, Calibration), Human-in-the-Loop Design
- **Technical:** Python, SQL, JavaScript, React, Supabase, Netlify, Git and GitHub, Webhooks and APIs
- **Contact Center:** Invoca, call qualification, AHT, FCR, containment, QA scoring
- **Platforms:** Google Ads, Microsoft Advertising, SA360, GA4, Adobe Analytics, Google Tag Manager, Offline Conversion Imports, Looker Studio, BigQuery, Tableau, Shopify
