SUMMARY

Search & measurement lead who managed \$75M in client spend across healthcare, retail, and B2B portfolios — combining channel leadership with hands-on conversion architecture, reporting automation, and AI-assisted tooling. Repeatedly the person who finds the silent measurement failure, builds the system that prevents the next one, and translates both into a narrative client leadership acts on.

EXPERIENCE

Ovative Group — *Senior Analyst, Search Engine Marketing · Chicago, IL*

June 2023 – Present

- Search channel lead across eight accounts — six Optum healthcare business units plus GNC and C.H. Robinson — holding final accountability for strategy, output quality, QA/signoff, and client-facing narrative; managed \$75M in client spend.
- Drove a 175% YoY increase in Medicare enrollments during AEP through expanded keyword coverage, campaign restructuring, and conversion-pathway analysis aligned to client pipeline and revenue goals.
- Reversed declining efficiency in a flagship retail search program: reduced spend 13% YoY while growing revenue 5% (\$1.32M vs. \$1.26M) and improving ROAS from \$7.30 to \$8.80; post-launch non-brand restructure delivered +86% week-over-week ROAS as CPCs fell 33%.
- Built “Backbone,” a config-driven reporting automation (Google Ads scripts + Sheets) with binding guards, healthcare modes, and a tie-out assertion suite that gates publishing — integrating 15+ KPIs and returning 300+ hours per quarter; the tie-outs caught a defect routing 100% of a client’s spend to the wrong segment while every additivity check passed.
- Designed call-signal conversion architecture (Invoca spoken-phrase buckets and conversion-action matrices) so bidding optimizes toward lead quality; executed a full cross-engine pixel cutover on two business days’ notice and a complete SA360 offboarding with zero measurement gaps.
- Authored the portfolio RACI and growth plan for a five-person team, managed a summer intern against a 13-week curriculum mapped to firm leadership competencies, and built firm-wide Holistic Search training used beyond my own accounts.

Zero To Secure — *Founder · Chicago, IL*

July 2025 – Present

- Bootstrapped a DTC brand end to end as a solo operator — product positioning, Shopify build, SEO content strategy, and go-to-market execution.
- Applied AI-assisted workflow automation to content creation, competitive research, and funnel analysis across a lean, full-stack operation.

AbbVie — *Strategic Initiatives Analyst · North Chicago, IL*

March 2022 – May 2023

- Supported the \$63B AbbVie–Allergan enterprise integration, resolving cross-functional process bottlenecks and managing a 2,400-user project platform.
- Built reporting tools that improved operational visibility across integration workstreams in a large-scale organizational data environment.

EDUCATION

University of Wisconsin–Madison — Bachelor of Business Administration; double major, Marketing and Risk Management & Insurance

May 2023
