Cameron Carpenter

Solutions Consultant | Applied AI | Technical Discovery | Client Strategy

Chicago, IL | cam.carp14@gmail.com | (608) 239-5304 | camcarp.com/work | linkedin.com/in/cameroncarpenter1

SUMMARY

Client-facing consultant who leads discovery, answers objections and builds the technical solution. Day-to-day client lead with $75M+ in media managed since 2023, now running nine enterprise accounts. Builds production LLM workflows, including Claude skills that categorize ~1,000 calls a week for one client, backed by golden datasets, LLM-as-judge scoring and human review.

EXPERIENCE

Ovative Group | Senior Analyst, Search Engine Marketing Chicago, IL | Jun 2023 – Present

Channel lead and day-to-day client contact for nine accounts: a Fortune 5 payer's seven healthcare business units, a national retail brand and a global logistics provider. Present weekly to 12+ client stakeholders and run quarterly business reviews.

Client leadership and results

- Drove a 175% YoY enrollment increase for a national Medicare marketplace during the Annual Enrollment Period (AEP). Results earned $5M in incremental investment, bringing AEP spend to $35M. Owned the full forecast and budget plan in other AEPs.
- Led new-account discovery, handled objections with data-backed rebuttals and pitched incremental budget to decision-makers.
- Designed Value-Based Bidding around call-quality signals, moving healthcare programs from raw call volume to qualified outcomes with revenue-tied KPIs for non-technical client leaders. Kept AEP campaigns compliant with CMS-approved copy.
- Led the SEM launch for a new healthcare provider, from strategy to reporting on qualified calls and appointments.
- Reversed declining efficiency on a national retail brand, cutting spend 13% while growing revenue 5% and ROAS 20%, then led its migration off SA360 without disruption.

AI systems and enablement

- Replaced manual call categorization for one client, slow because Invoca data wasn't 1:1 clean. Set up spoken phrase and built Claude skills that pair its exports and tracking data with Google Ads and Microsoft Ads data over MCP in a locked-down stack, drafting client-ready insights and cutting each run from 45 minutes to 5 across ~1,000 calls a week.
- Built the evaluation layer behind those skills. Golden datasets, rubrics and LLM-as-judge scoring test every version before client delivery, and any agent that takes action needs human approval.
- Saved 300+ hours a quarter by rolling out AI reporting, pacing and forecasting automations to 5 analysts across 10+ accounts.
- Built a visual workflow tool that cut skill build time from hours to ~30 minutes.
- Cut review time 50% with a Claude tool that critiques and corrects reasoning on drafts by a direct report and three analysts.
- Ran a 13-week intern curriculum that earned a return offer.

Zero To Secure | Founder Chicago, IL | Jul 2025 – Present

- Founded and run a bootstrapped DTC brand solo, owning Shopify development, SEO content and go-to-market, with AI agents for organic growth and creator outreach behind a human approval step.

AbbVie | Strategic Initiatives Analyst North Chicago, IL | Mar 2022 – May 2023

- Supported the $63B AbbVie-Allergan integration, resolving cross-functional bottlenecks and building reporting tools that gave leadership visibility into workstream status and risk.

PROJECTS

Medicare Enrollment Call Evaluation Pipeline | Personal project, synthetic data

- Python pipeline that grades synthetic Medicare sales calls on compliance, eligibility and plan accuracy.
- LLM-as-judge and rule-based checks calibrated against a blind-labeled, reviewed answer key and audited against planted answers, ending in a written eval readout.

Call Analytics MCP Server | Personal project, synthetic data

- MCP server that lets Claude query graded calls, grade new ones through the pipeline and draft offline-conversion batches. Releasing a batch requires human approval, enforced in code rather than the prompt.

EDUCATION

University of Wisconsin-Madison | BBA, Marketing and Risk Management & Insurance May 2023

SKILLS

- **Client:** Discovery, Objection Handling, QBRs, Stakeholder Communication, Strategic Roadmaps, Client Enablement
- **AI and Evaluation:** Claude (Enterprise, Code), Agent Skills, MCP, Evals (Golden Datasets, LLM-as-Judge, Calibration), Human-in-the-Loop Design
- **Technical:** Python, SQL, JavaScript, React, Supabase, Netlify, Git and GitHub, Webhooks and APIs
- **Platforms:** Google Ads, Microsoft Advertising, SA360, GA4, Adobe Analytics, Google Tag Manager, Offline Conversion Imports, Looker Studio, BigQuery, Tableau, Invoca, Shopify
