Applied AI | AI Evaluation and Deployment | Healthcare and Medicare

Chicago, IL | cam.carp14@gmail.com | (608) 239-5304 | camcarp.com/work | linkedin.com/in/cameroncarpenter1

SUMMARY

Applied AI builder who designs, evaluates and deploys LLM workflows on real conversation data. Built production Claude skills that qualify ~1,000 calls a week for one client, backed by golden datasets, LLM-as-judge scoring and human review, and led the rollout of AI automations to 5 analysts across 10+ accounts. Day-to-day client lead with deep Medicare payer context and $75M+ in media managed since 2023.

EXPERIENCE

Ovative Group | Senior Analyst, Search Engine Marketing Chicago, IL | Jun 2023 – Present

Channel lead for nine accounts, including seven healthcare units of a Fortune 5 payer, presenting weekly to 12+ stakeholders.

AI systems and enablement

- Cut call analysis from 45 minutes to 5 per run across ~1,000 calls a week for one client. Set up Invoca spoken phrase and built Claude skills that pair its exports and tracking data with Google Ads and Microsoft Ads data over MCP to categorize calls and draft client-ready insights inside a locked-down stack. This was manual work because Invoca data wasn't 1:1 clean.
- Built the evaluation layer behind those skills. Golden datasets, rubrics and LLM-as-judge scoring test every version before client delivery, and any agent that takes action needs human approval.
- Saved 300+ hours a quarter by rolling out AI reporting, pacing and forecasting automations to 5 analysts across 10+ accounts.
- Built a visual workflow builder that cut skill build time from hours to ~30 minutes.
- Cut review time 50% with a Claude insight tool that critiques and corrects analysts' reasoning on their own drafts, using account data from MCP connectors. A direct report and three analysts use it weekly.
- Ran a 13-week intern curriculum that earned a return offer.

Client strategy and results

- Drove a 175% YoY enrollment increase for a national Medicare marketplace during the Annual Enrollment Period (AEP). Results earned $5M in incremental investment, bringing AEP spend to $35M. Owned the full forecast and budget plan in other AEPs.
- Designed Value-Based Bidding around call-quality signals, moving healthcare programs from raw call volume to qualified outcomes, and kept AEP campaigns compliant with CMS-approved copy.
- Led discovery for new accounts, handled objections with data and pitched incremental budget to decision-makers.
- Reversed declining efficiency on a national retail brand, cutting spend 13% while growing revenue 5% and ROAS 20%, then led its migration off SA360 without disruption.
- Piloted Google betas with platform reps and partnered with data, SEO and client teams to catch tracking issues early.

Zero To Secure | Founder Chicago, IL | Jul 2025 – Present

- Founded and run a bootstrapped DTC brand solo, owning Shopify development, SEO content and go-to-market, with AI agents for organic growth and creator outreach behind a human approval step.

AbbVie | Strategic Initiatives Analyst North Chicago, IL | Mar 2022 – May 2023

- Supported the $63B AbbVie-Allergan integration, resolving cross-functional bottlenecks and building reporting tools that gave leadership visibility into workstream status and risk.

PROJECTS

Medicare Enrollment Call Evaluation Pipeline | Personal project, synthetic data

- Python pipeline grading synthetic Medicare calls on TPMO disclaimer, scope of appointment, eligibility and plan accuracy.
- LLM-as-judge and rule-based checks calibrated against a blind-labeled, reviewed answer key and audited against planted answers, ending in a published eval readout.

Call Analytics MCP Server | Personal project, synthetic data

- MCP server that lets Claude query graded calls, grade new ones through the pipeline and draft offline-conversion batches; releasing a batch requires human approval, enforced in code rather than the prompt.

EDUCATION

University of Wisconsin-Madison | BBA, Marketing and Risk Management & Insurance May 2023

SKILLS

- **AI and Evaluation:** Claude (Enterprise, Code), Agent Skills, MCP, Evals (Golden Datasets, LLM-as-Judge, Calibration), Human-in-the-Loop Design
- **Technical:** Python, SQL, JavaScript, React, Supabase, Netlify, Git and GitHub, Webhooks and APIs
- **Contact Center:** Invoca, call qualification, AHT, FCR, containment, QA scoring
- **Platforms:** Google Ads, Microsoft Advertising, SA360, GA4, Adobe Analytics, Google Tag Manager, Offline Conversion Imports, Looker Studio, BigQuery, Tableau, Shopify
