Cameron Carpenter

Solutions Consultant | Applied AI | Technical Discovery | Client Strategy

Chicago, IL | cam.carp14@gmail.com | (608) 239-5304 | camcarp.com/work | linkedin.com/in/cameroncarpenter1

SUMMARY

Client-facing consultant who leads discovery, answers objections, then builds and deploys the technical solution, and who has led 20 accounts and managed $75M+ in media since 2023. Owns strategy, forecasting, and budgets for healthcare, retail, and logistics brands, turning performance data into clear recommendations for senior stakeholders. Builds AI tools and Claude skills for conversation intelligence, and drives their adoption across analysts and clients.

EXPERIENCE

Ovative Group | Senior Analyst, Search Engine Marketing Chicago, IL | Jun 2023 – Present

Channel lead and day-to-day client contact for nine accounts: seven healthcare business units under a Fortune 5 payer and two logistics brands. Present weekly to 12+ client stakeholders; run QBRs and enablement sessions that build program buy-in.

Client Leadership and Results

- Drove a 175% YoY enrollment increase for a national Medicare marketplace during the Annual Enrollment Period (AEP), a result that shifted how the client valued paid search, and earned $5M in incremental investment, bringing AEP spend to $35M.
- Designed Value-Based Bidding for healthcare programs that weights funnel signals, from qualified calls to appointments, by revenue-based conversion values, giving automated bidding richer signal than raw call volume.
- Reversed declining efficiency for a national retail brand, growing revenue 5% and ROAS 20% while cutting spend 13%, then led its migration off SA360 without a performance disruption.
- Set client roadmaps, including launches for new accounts, winning buy-in on strategy and test proposals, and leading a team of analysts through execution.
- Lead new-account discovery, handle objections with data-backed rebuttals, and pitch incremental budget to decision-makers.
- Partner with Invoca developers to integrate call tracking into client sites; pilot ad platform betas with Google and Microsoft.

AI Systems

- Cut call analysis from 45 minutes to 5 per run across ~1,000 weekly calls for one client, using Claude skills that combine Invoca call records with tracking and ad platform data through MCP connectors and turn the results into client-ready insights.
- Built the evaluation layer behind those skills, testing every version with golden datasets, rubrics, and LLM-as-judge scoring.
- Created a low-code tool that turns complex processes into Claude skills, cutting build time from an hour to ~30 minutes.

Team Leadership and Enablement

- Mentored a summer intern through a 13-week curriculum I designed; now a full-time analyst and my direct report.
- Coach three analysts on shared accounts with regular feedback and guidance. AI review tools I built help keep that feedback consistent and actionable, push them to explain the why behind the numbers, and cut my review time 50%.
- Deployed reporting, pacing, and forecasting automations to 5 analysts across 10+ accounts, saving 300+ hours a quarter.
- Wrote the analysis and reporting playbooks my account team uses, and helped a junior analyst build his first Claude tool.

Zero To Secure | Founder Chicago, IL | Jul 2025 – Present

- Founded and run a bootstrapped DTC brand solo, owning Shopify development, SEO content, and go-to-market. Built AI agents for organic growth and creator outreach, each behind a human approval step.

AbbVie | Strategic Initiatives Analyst North Chicago, IL | Mar 2022 – May 2023

- Managed the project management platform behind the $63B AbbVie-Allergan integration, built reporting tools that gave leadership visibility into workstream status and risk, and resolved cross-functional bottlenecks.

PROJECTS

Medicare Enrollment Call Evaluation Pipeline | Personal Project, Synthetic Data

- Python pipeline that grades synthetic Medicare sales calls on compliance, eligibility, and plan accuracy.
- LLM-as-judge and rule-based checks calibrated against a blind-labeled answer key, with an eval readout on results and limits.

Call Analytics MCP Server | Personal Project, Synthetic Data

- MCP server that lets Claude query, grade, and batch calls for offline conversions, holding every batch until a human approves it.

EDUCATION

University of Wisconsin-Madison | BBA, Marketing and Risk Management & Insurance May 2023

SKILLS

- **Client:** Discovery, Objection Handling, QBRs, Roadmap Execution, Project Management, Client Enablement
- **AI:** Claude (Enterprise, Code), Agent Skills, MCP, Evals (Golden Datasets, LLM-as-Judge), RAG, Human-in-the-Loop Design
- **Technical:** Python, SQL, JavaScript, React, Supabase, Netlify, Git and GitHub, Webhooks and APIs
- **Platforms:** Google Ads, Microsoft Advertising, SA360, GA4, Adobe Analytics, Google Tag Manager, Offline Conversion Imports, Looker Studio, BigQuery, Tableau, Invoca, Shopify
