SUMMARY

Performance marketing and revenue operations professional who has managed \$75M+ in media spend since 2023 across healthcare, retail, and logistics. Responsibilities span media planning, budget ownership, conversion tracking architecture, forecasting, and pacing, with particular depth in the backend reporting layer that connects platform, analytics, and CRM data into dashboards and automated deliverables.

EXPERIENCE

Ovative Group | Senior Analyst, Search Engine Marketing – Chicago, IL June 2023 - Present

- Managed \$75M+ in client media spend since joining in 2023, including six healthcare business units under a Fortune 5 payer, a national retail brand, and a global logistics provider. Day-to-day ownership includes budget forecasting, pacing models, and weekly performance analysis, alongside the quarterly business reviews and strategic planning presented to senior stakeholders.
- Built automated reporting, pacing, and forecasting systems adopted by multiple client teams, saving 300+ hours per quarter. Data-integrity checks built into each system cut the reporting errors that had previously reached client deliverables.
- Structured conversion tracking and bidding signals so campaigns optimized toward lead quality rather than raw volume, using call-quality conversion data, value-based bidding frameworks, and KPI hierarchies tied to downstream pipeline and revenue.
- Consistently identified performance discrepancies and traced them to root causes such as broken conversion tracking, misconfigured signals, or understated platform spend, resolving each before it reached clients or bidding algorithms.
- Reversed declining efficiency on a national retail brand, cutting spend 13% YoY while growing revenue 5% and improving ROAS 20%, then redirected the savings into more incremental tactics across the portfolio.
- Drove a 175% YoY increase in enrollments for a national Medicare insurance marketplace during AEP through broader qualified reach, campaign restructuring, and rebuilt conversion pathways tied to pipeline and revenue goals.
- Developed the strategic roadmaps behind each account, drawing on SEO, paid social, video and programmatic, and measurement team partnerships. Initiatives were sequenced by effort and impact with phase-specific goals and KPI hierarchies, giving clients a clear view of what was being prioritized and why.
- Became a go-to resource on lead generation within the SEM team, authoring trainings, best practices, and enablement materials for the broader group. That work carries into direct coaching, developing junior analysts across several accounts and guiding a summer intern through a self-authored 13-week curriculum.

Zero To Secure | Founder – Chicago, IL July 2025 - Present

- Built a bootstrapped DTC e-commerce brand end to end as a solo operator, owning product positioning, Shopify development, SEO content strategy, and go-to-market execution.
- Full-funnel ownership spans lifecycle and CRM strategy, cohort analysis, conversion rate optimization, and AI-assisted content production.

AbbVie | Strategic Initiatives Analyst – North Chicago March 2022 - May 2023

- Supported the \$63B AbbVie-Allergan enterprise integration within a highly matrixed organization, resolving cross-functional process bottlenecks and administering a 2,400-user project platform.
- Created reporting tools that improved operational visibility across integration workstreams.
